Attached are the cost and quantity tables for use in our December 7 technical team discussion from noon to 2:30 pm at CH2M Hill in Oakland.

As mentioned on the ETCA call, we do not have the preliminary indication from insurance yet. We will let you know soon when we might be getting those indications.

Please note, as discussed in November with tech team, the Soil Vapor Mitigation Costs are based on the red and orange squares that we had up until this date. The new soil vapor "red and orange square" information that we received at the BCT today - if confirmed and approved by the BCT, will obviously change the square footage calculation and the associated costs.

Tim - we've attached blank tables for your use if you wish. We've added an extra break out row on the first page that you didn't have in the previous blank version.

btw - because I had printer problems Alfonso produced duplicate copies of the 11x17 quantity tables that print well in 8 1/2 x 11. hope you find them useful. You can use either version - they are duplicates.

thanks,
